EXPERIENCE

Lawbrokr - Product Engineer - January 2026 - Present

- Lead the design and development of user-facing React features in close partnership with the product team, helping shape product direction, user flows, and UX decisions.
- Translate product requirements and Figma concepts into polished, responsive, mobile-first interfaces with careful attention to layout, usability, and visual consistency.

Interad - Frontend Engineer - August 2021 - December 2025

- Worked across agency projects with distinct audiences, visual identities, and technical requirements, adapting quickly between brands and design systems.
- Created responsive interfaces, interactive tools, landing pages, application experiences, and reusable components using React, Angular, JavaScript, and CSS.

Reliance - Frontend Engineer - January 2020 - August 2021

- Designed and developed responsive digital experiences using JavaScript, CSS, Vue, React, Figma, and Adobe Creative Suite.
- Created user interfaces that translated business goals and brand requirements into clear, approachable consumer experiences.

EDUCATION

OCAD University - Bachelor of Fine Arts, Integrated Media 2015 - 2019

Interdisciplinary creative technology program focused on visual design, user experience, interaction design, digital art, illustration, drawing, animation, motion, game and interactive media, creative coding, and web development. Developed interactive experiences using tools and technologies including Unity and Adobe Creative Suite.

Humber College - Graduate Certificate in Web Development 2020 - 2021

Full-stack web development program covering interface development, user experience implementation, accessibility, responsive applications, database design, and software development. Technologies included ASP.NET, Node.js, React, Python, JavaScript, databases, and modern web development practices.
